EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- a. On page 5, line 8 after "sheathing" was inserted, --as schematically shown in Figure 2--, in order to clarify that the illustration of the sheathing is for illustration purposes only, and does not convey shape, size, etc., which would be new matter.
- b. In claim 9, line 4, --substantially-- was inserted before "electrically" because the arm is not completely electrically insulated with respect to the steering wheel, as it has to engage metal contacts 34 (note the specification at page 5, lines 5-8).
- c. In claim 14, line 3, --substantially-- was inserted before "electrically" because the arm is not completely electrically insulated with respect to the steering wheel, as it has to engage metal contacts 34 (note the specification at page 5, lines 5-8).

2. The following changes to the drawings have been approved by the examiner: The proposed drawing correction filed 10/4/04 was not approved because the sheath as illustrated

would not leave an area for the contacts 34 and because replacement drawings were not included with the drawing proposal (see paragraph 1 of the Office action mailed 6/30/04). The changes shown in red in Figure 2 accompanying this action to illustrate the sheathing is approved by the examiner. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.
